

INDUNA

PRODUCT SPECIFICATIONS

Description: Knee length gumboot.

Identification: Black Shaft with Black Sole.
White CLAW Branding.

Unisex

COMPOSITION

PVC Upper and Sole.

4-12

Sizes

Colour

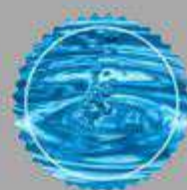

FEATURES

- The CLAW Sole is ergonomically designed to disperse body weight reducing stud pressure and foot fatigue. Maximizing comfort leading to increased productivity
- CLAW "TOES FREE" System - The continued movement of the toes inside the front of the boot creates a bellows effect pumping out hot air and taking in cool which reduces bacterial growth
- Profile positioning on the instep is designed to assist in climbing
- Dual density PVC creates a shock absorbent layer
- Unlike any other boot in the market all CLAW Boots are designed to fit like a shoe, minimizing foot and ankle movement inside the boot. The increased foot stability allows the boot to "Track" the wearer's foot, affording greater agility whilst reducing "slip and falls" and "ankle twists"
