

ULTRA TECH

PRODUCT SPECIFICATIONS

Description: Acid, Blood and Fat resistant gumboots with a steel toe cap.

Unisex

Identification: White shaft with Grey Sole. Black CLAW Branding.

COMPOSITION

Blend of Nitrile rubber and PVC. 200 joule steel toe cap.

4-12

Sizes

Colour

FEATURES

- The CLAW sole has a thicker base which insures better wear, reduces stud pressure and slows the movement of cold air through the sole
- Designed like a shoe, to minimize foot and ankle movement inside the boot
- The increased foot stability, allows for greater agility whilst reducing "slip and falls" and "ankle twists". Reinforced, thickened forepart vamp & toe protects the foot, for greater personal protection
- "TOES FREE" System - Movement of toes inside boot creates a bellows effect pumping hot air out and sucking in cold - reducing bacterial growth
- Wider shaft for easy foot access
- Dual density PVC
- The ULTRA-TECH sole has nitrile rubber insuring greater protection and substance which increases boot life
